Software Engineer Trainee->Software Engineer->Sr. Software Engineer

➢ **Market Guide Publishing & User Web**   **May 2009 - Dec 2010**
  Software Engineer->Sr. Software Engineer

Market Guide is an imperative part of CDS (**CITI** Direct for Securities, USA) application which provides market information about various publications across the globe to the subscribed users. The application mainly consisted of Market Guide Publishing used by the authors or publishers who publish the information and Market Guide User Interface which is used by subscribers to access the information published by authors. The application is built on Struts framework, uses SPRING for dependency injection and Hibernate as ORM tool.

Responsibilities:
- Understanding and Analyzing Requirements through client communication.
- Understanding of developed Framework for User Interface.
- Involved in the developing user interface for various modules using JSP and Struts.
- Involved in development of business logic according to the design specification.
- Involved in validating forms using Struts and Spring-validation.
- Involved in writing and executing JUNIT test cases.
- Bug Tracking and Fixing through JIRA.
- Providing Production Support.
- Documentation (SDLC).

➢ **CDS2 Delivery Manager**   **Oct 2008 - May 2009**
  Software Engineer

Delivery Manager is a centralized application for CDS (**CITI** Direct for Securities, USA) which is responsible for delivering and keeping track of various messages sent to the various delivery channels like EMAIL, GXS, FTP and Desktop Manager by the various CDS

applications like CAIN, GFAR, Custody Reporting and Transaction Manager. It also provides feature for maintaining existing destinations and creating new destinations through entitlements. The application is built on Spring MVC and uses Hibernate as ORM.

Responsibilities:
- Understanding and Analyzing Requirements through client communication.
- Understanding of developed framework for user interface.
- Involved in the developing user interface for various modules using JSP and Spring MVC.
- Involved in development of business logic according to the design specification.
- Worked on validating forms using spring-validation framework.
- Involved in writing and executing JUNIT test cases.
- Bug Tracking and Fixing through JIRA.
- Providing Production Support.
- Documentation (SDLC).

➢ **Click for Insurance**   **March 2008 -June 2008**
Software Engineer Trainee->Software Engineer

Click for Insurance is **L&T Infotech** internal web portal. Its objective was to build a portal with complete functionality of comparing various insurance quotes such as Personal Accident, Health, Life, Motor, Travel, Home and buying insurance online. The idea was to bridge the gap between carriers and the customers and make buying insurance easy for the customers. The application is built on Struts framework.

Responsibilities:
- Understanding and Analyzing Requirements.
- Involved in development of business logic according to the design specification.
- Involved in writing and executing JUNIT test cases.
- Documentation (SDLC).

➢ **E-Recruitment System**   **Dec 2007 - Jan 2008**
Software Engineer Trainee

E-Recruitment System was a proof of concept designed for **L&T Infotech** in Java during our project training phase. Using the e-Recruitment system business unit send the requirement to the HR. Candidates submit their resume online. HR shortlist the Candidates as per the requirement and sends back the list to business unit for contacting the short listed candidates for the interview.

Responsibilities:
- Understanding and Analyzing Requirements.
- Involved in development of business logic according to the design specification.
- Documentation (SDLC).
